

Artificial Intelligence in Finance
at
Hong Kong University of Science and Technology

Course Schedule

Session	Date	Topic	Application & Case Study	In-Class Activity
1	Feb 1	– History and Overview of Artificial Intelligence	– Google Experiments: Draw!	– Kahoot
2	Feb 15	– Supervised & Unsupervised Learning – Classification vs. Regression	– Google Experiments: Vision Sensing – Case study: HireVue (Video Analytics for Recruitment)	– Class survey and group formation – Kahoot
3	Feb 22	– Regression & Classification – Model Assessment and Selection	– Speaker: Katrina Fong – Case study: WorkFusion (Robotic Process Automation)	– Kahoot
4	Mar 1	– Neural Network Basics – Perceptrons	– Credit analysis – Case study: Clover (Temporal Unfolding)	– Kahoot
5	Mar 8	– Deep Learning – Hyperparameter Optimization & Tuning	– TensorFlow Neural Network Playground	– Kahoot
6	Mar 15	– Practitioners' Perspectives – Independent Consultation for Projects	– Slido Q&A	– Sharing from researchers and industry professionals
7	Mar 22	– Recurrent Neural Network (RNN)	– Natural language processing – Case study: Deep Instinct (Cybersecurity) – Speaker: Mr. Jeffrey Hui	– Word2Vec – Kahoot
8	Mar 29	– Convolutional Neural Network (CNN)	– Google Image Recognition – Case study: SenseTime (Computer Vision)	– 3D Visualization of CNN – Kahoot
9	Apr 12	– Reinforcement Learning	– Case study: Osaro (Robotics), Ascent (Autonomous Driving)	– Kahoot
10	Apr 26	– Midterm Exam – Independent Consultation for Projects		– TBA
11	May 3	– Recent Advances & Applications of AI – Catalysts & Enablers of AI	– Recap of concepts – Case studies: Airobotics (Drones), Cornami (AI Chip)	– Kahoot
12	May 10	– Frontiers of AI – Challenges in AI Commercialization	– Recap of concepts – Case studies: Prophesee (Computer Vision), Prowler (AGI) – Speaker: Mr. Christopher Lee	– Review of Neural Ordinary Differential Equations (NIPS 2018)
13	May 17	– Synthesis & Outlook		– Final presentations (details TBD)

Note: Details may change depending on class progress, development of relevant technologies, as well as information and feedback from students' surveys.

Beyond the Classroom

Session	Date	Topic	Session	Date	Topic
3	Feb 22	– HireVue: Recruiting & AI	8	Mar 29	– LinkedIn & Networking
4	Mar 1	– Industry Primer: FinTech & VC/PE	9	Apr 12	– Industry Primer: Investment Banking
5	Mar 8	– CV Writing & Interview Preparation	10	Apr 26	– Certifications (CFA, CPA, GMAT...)
6	Mar 15	– Company Research: Bloomberg, McKinsey Insights, Zero2IPO	11	May 3	– Industry Primer: Management Consulting
7	Mar 22	– N/A	12	May 10	– PowerPoint & Presentation Skills

**WE'RE
HIRING!**

**Alpha
Intelligence
Capital**

Key Responsibilities

- Keen interest and experience in venture capital transactions and financial analysis
- Familiar with transaction legal documents and investment structure
- Understanding of the commercialization of technologies from an investor perspective
- Conduct due diligence for potential investments in the AI space
- Assist in the preparation of deal-related materials (e.g. data collection, industry research, comparable company and valuation analysis)

Position Requirements

- Undergraduate or postgraduate students, preferably majoring in Finance, Investments, Legal Studies, and/or Business Analytics
- Experience in using Bloomberg, S&P Capital IQ, Pitchbook, and Wind preferred
- Exposure and understanding of the high-tech industry (especially AI/ML) a plus
- Strong sense of responsibility and attention to details

Availability: Spring and Summer 2019

Number of Openings: 1-2

Remuneration: Market competitive

Office: Central • Hong Kong

Anthony Woo

CFA CAIA FRM

Associate Director

Alpha Intelligence Capital

Final Project Options

	Option A	Option B
Nature	Unleash your imagination	Solve a real-life problem
Organization	HKUST	HKUST & AIC
Advantage	More freedom ¹	More guidance
Requirements	N/A	Interview
Scope	No limit	Specific
Group Composition	Free for all	Managed
Deliverables	Final presentation	Monthly progress reports Monthly update meetings Final presentation
Recommendation Letter	N/A	Provided ²
Full-Time Positions	Considered	Considered

Note 1: Equal amount of guidance provided for Option A but more self-initiative is called for.

Note 2: Recommendation letters provided based on satisfactory performance.

**Robotic Process Automation
机器人与工序自动化**

Full-stack AI-enabled Robotic Process Automation (RPA) solution suite for business-critical tasks spanning multiple applications and data silos

**Quantum Computing
量子计算**

Solution provider and platform developer for quantum and classical computing for predictive analytics, forecasting, and optimization

**Computer Vision
计算机视觉**

Developer of deep learning technology-based computer vision solutions aimed at a broad range of consumer and enterprise applications

**Knowledge Graph
知识图表**

Dynamically evolving knowledge graphs that provides inference strength across concepts, events and themes derived from a wide variety of information services

Track & Monitor

**Real-Time Robotics Automation
实时机器人自动化**

Deep reinforcement learning-based AI software platform that enables enhanced perception, reaction and control in real-time robotics environments

**AI Chips
人工智能芯片**

Deep reinforcement learning-based AI software platform that enables enhanced perception, reaction and control in real-time robotics environments

**Cybersecurity
网络安全**

Advanced deep learning technology-based cybersecurity products and solutions for threat detection and prevention

**Music Augmentation
音乐强化**

Developer of a music augmentation technology that transforms linear music to dynamically personalized music for consumers, ad-agencies, music labels, and producers

Katrina Fong

FinTech Recruiting Consultant at Hays

www.linkedin.com/in/katrinafong

- Katrina is a FinTech specialized recruitment consultant from Hays, and is completing Higher Education Teaching Certificate course from Harvard. She has a history of building successful working relationships with exceptional clients across the FinTech space in AI, Machine Learning, Crypto & Blockchain, Payment, Virtual Bank, Digital Transformation, Robo Advisory etc.
- She has played key roles in building the technology teams for **HSBC (PayMe & Jasmine FinTech)**, **Standard Chartered Bank** (Virtual Banking), **Hang Seng Bank** (Digital Transformation via Chatbots and AI), **DBS Innovation Hub**, **Bank of East Asia**, **Tencent**, **Alipay**, **Blue** (first digital life insurer by Aviva and Tencent), **Alipay**, **Accenture**, **KPMG**, **Deloitte Digital**, **PricewaterhouseCoopers**, and leading FinTech start-ups such as **WeLend**, **Privé Technologies**, **MioTech** etc. Due to this wealth of knowledge, market intelligence, and extensive network, she has many repeated success in the FinTech field and retained on the region's most high profile assignments.
- Prior to recruitment, Katrina used to be a serial entrepreneur in Education Consulting as well as EF Education as Course Leader in United States & United Kingdom.

Case Studies: HSBC & Hang Seng

- HSBC's chatbot is called Amy, while Hang Seng Bank's are called DORI and HARO
- As well as being there 24/7 to answer customer queries, the chatbots will also help to speed up services, which will save firms a great deal of money in the long run
- While DORI's role involves searching for dining discounts and making personalized recommendations to its customers through the likes of Facebook, HARO focuses on its customers' banking needs and is available both online and through the company's mobile app
- The hardest part for most firms is not the integration of AI into their business, but finding the right people to deal with the actual maintenance once up-and-running

Case Studies: Clare.AI & Asiabots

Claire.AI

- Chatbot start-up powered by machine learning and natural language processing, specifically in Cantonese
- Claire.AI helps financial institutions provide a more personalized experience for their customers

Asiabots

- Asiabots serves private clients to public clients and has developed a medical platform called Dr. Care (Clinicbot)
- Dr. Care utilizes latest natural language processing technology (Chinese, Cantonese, English) and AI to assist patients from understanding their potential health problems through symptom checking to finding a suitable doctors or medical solution

Chatbot Job Openings

Job Openings in Hong Kong

- Niche area with very limited number of vacancies, yet the demand is getting higher
- Not easy to find Chatbot Developers in Hong Kong, most of the time companies would buy from Vendor/Start-up and integrate
- Chatbot Product Owner, Project Manager, and Consultant are of high demand

Job Openings in Hong Kong (Cont'd)

- Candidates normally only have 2-3 years of professional working experiences within the area

FinTech Trends in Hong Kong

- Payment (PayMe, Tap & Go, Alipay, WeChat Pay)
- Crypto and Blockchain
- Wealth Management and Robo-Advisory
- Regulatory Tech (RegTech)
- Insurance Tech (InsurTech)
- Corporate-Startup Collaborations

Deep Learning on Bespoke Video Assessments

Question 1 of 6

Video Response

no retries minutes: 3

Scenario

Imagine you are responding to a call from a customer in which the person is noticeably upset because they are locked out of their account. She informs you that she needs to transfer funds immediately from her investment account to a bank account to avoid overdrawing on the account. You try to address the customer's concerns, but she demands to speak to your supervisor.

How would you attempt to de-escalate the situation first without involving your supervisor?

Academic & Professional Background

What is your undergraduate university and major?

Brief description of recent work experience (including internships):

Share with us something unique about yourself that is important to you (e.g. interests, hobbies, talents, awards, overseas experience):

Overview

- Provider of an **intelligent automation platform** designed to digitize enterprise operations
- Intelligent automation platform offers AI-based tools needed to automate business processes, enabling enterprises to digitize their operation, increase productivity and improve service delivery

Financing

- Raised US\$50 million of **Series E** venture funding in a deal led by Hawk Equity and Declaration Partners in May 2018 at a valuation of US\$350 million
- Investors include NewYork-Presbyterian Ventures, NGP Capital, Georgian Partners, Alpha Intelligence Capital, iNovia Capital, Guardian Life Insurance Company of America, and PNC Bank National Association

WorkFusion

Leading enterprise operations choose a single platform with all critical capabilities to avoid integration complexity and achieve highest automation rates at the lowest cost

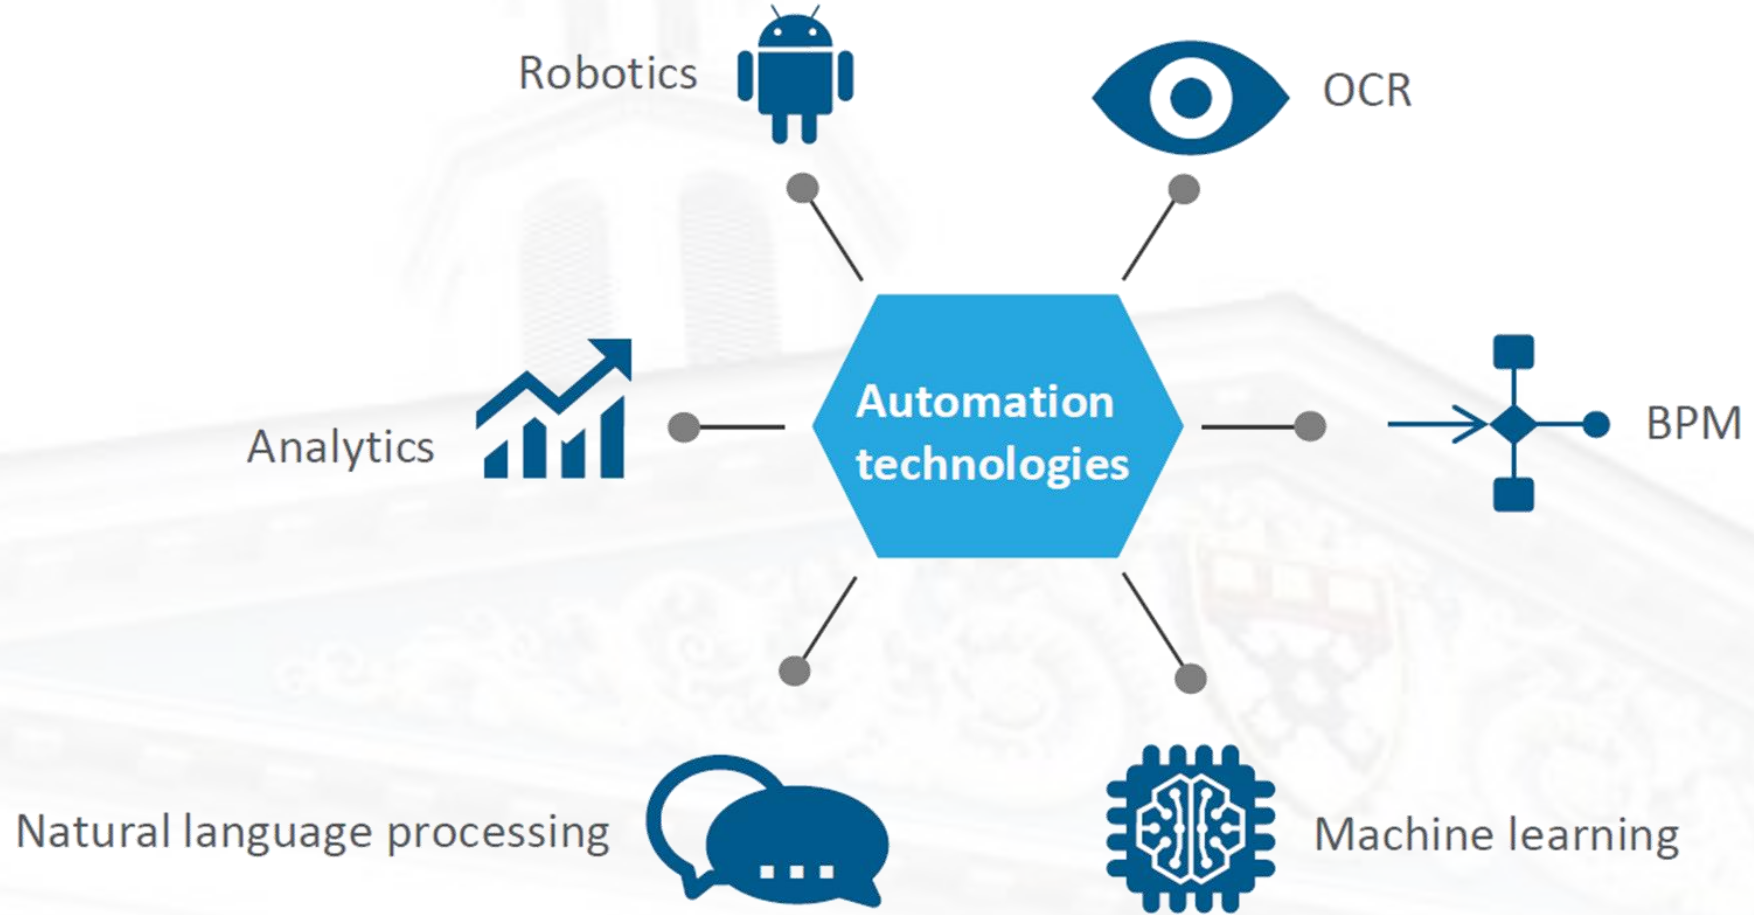

Source: WorkFusion

	Case Study I	Case Study II	Case Study III
Business Problem	The bank was looking at opportunities to improve their customer experience as part of their efforts to digitize bank operations	A global performance management company that provides information about what consumers watch and buy faced challenges in product categorization and SKU management	A leading multinational software corporation was looking to transform the way they process their customer invoices
Business Outcome	The bank reduced the average time for customer onboarding from 16 days to 9 minutes	Achieved 98.5% accuracy in product categorization with up to 70% of the process automated and reduced manual effort by up to 80%	67% reduction in the number of FTEs needed in the process and improved accuracy with 20% reduction in help desk inquiries

WorkFusion

	RPA	Cognitive Automation
Key Characteristics	<ul style="list-style-type: none">• Deterministic• Rules-based automation• Workflows and code are embedded manually• Deployed to automate transactional and repetitive tasks of business processes• Handles structured and semi-structured data	<ul style="list-style-type: none">• Automates knowledge-based processes• Learns by itself and builds knowledge bases over time• Deployed to automate conversational and complex business processes• Handles all types of data including unstructured
Differentiating Technologies & Capabilities	<ul style="list-style-type: none">• Screen scraping• Rules engine• Basic analytics• Library of pre-built automations• Bot performance analytics	<ul style="list-style-type: none">• Machine learning• Natural language processing• Advanced analytics• Data capture• Workplace analytics• Automated training and self-learning• Library of machine learning algorithms• Performance management• Resource management

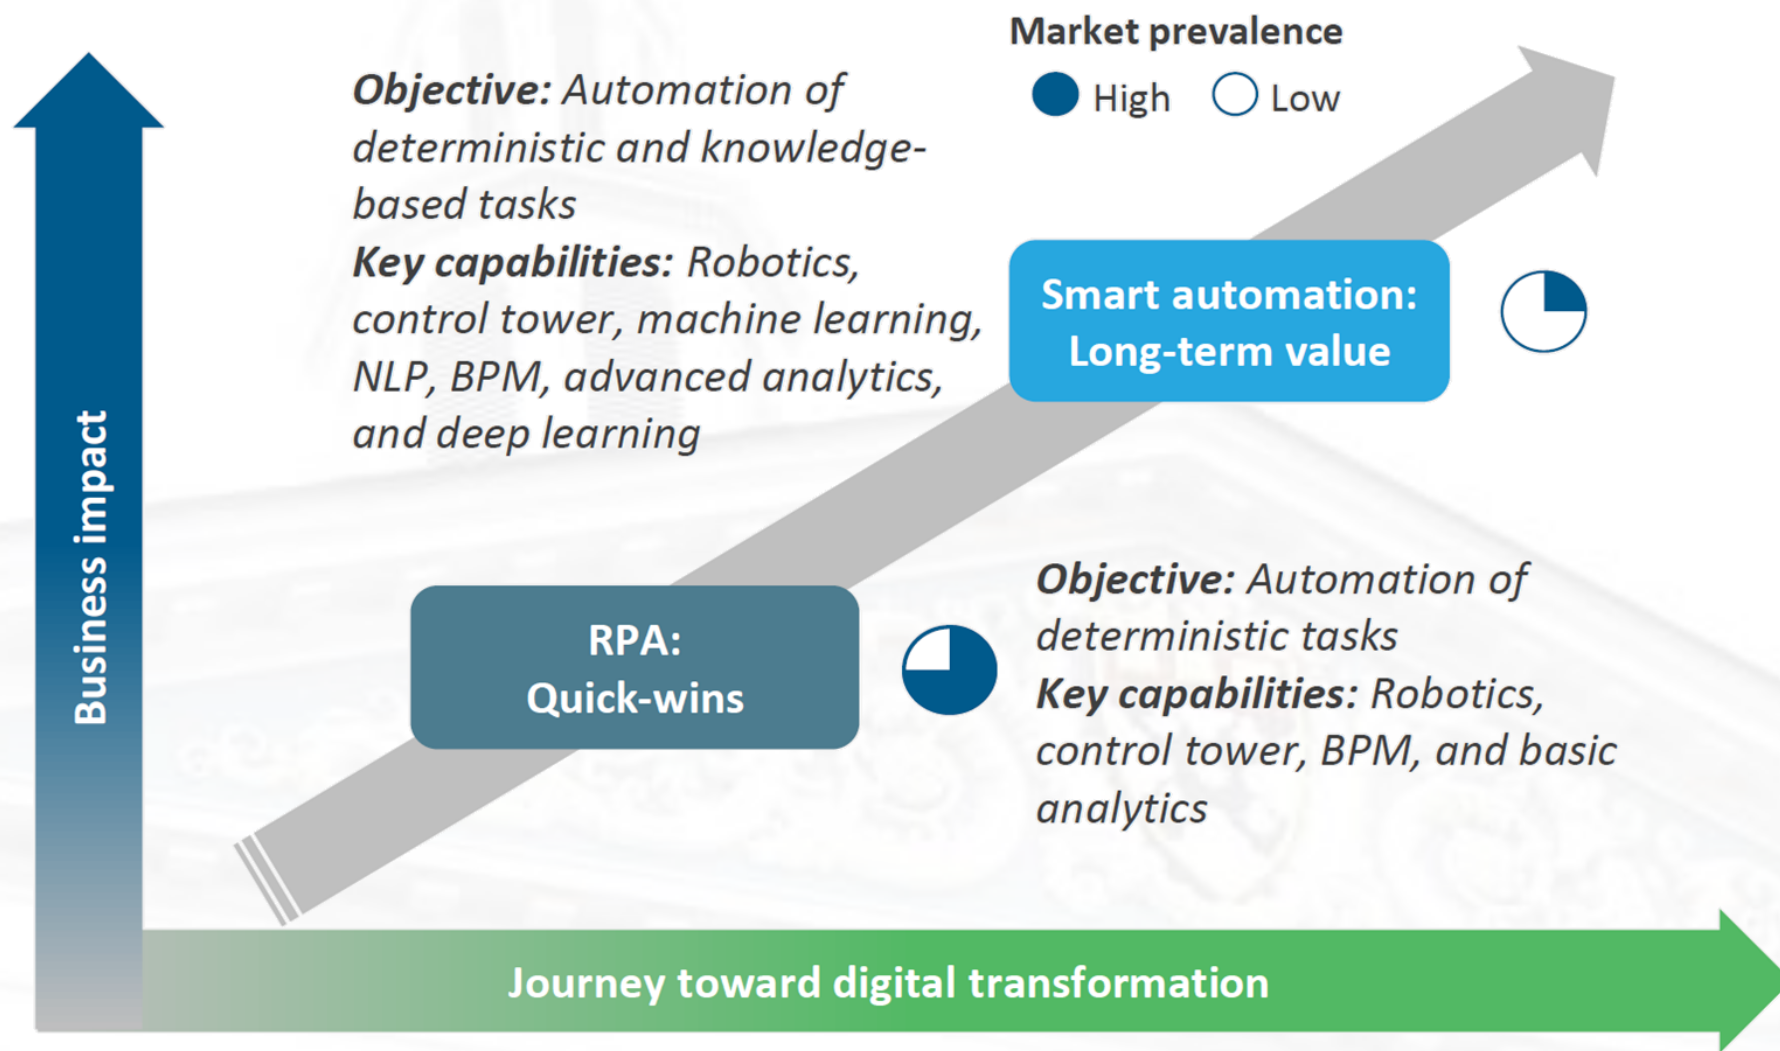

Bot	Key Characteristics
Agent-Assist Bot	<ul style="list-style-type: none">• Assist customer service agents in handling queries by automating various applications• Monitor the screen of agents and guide them with the next best action
Copy-Paste Bot	<ul style="list-style-type: none">• Execute rules-based processes to move structured data from one application to another
Reconciliation Bot	<ul style="list-style-type: none">• Match transactions across disparate systems and detect errors (e.g. subjective mapping and hence such bots also require AI capabilities)
Dispatch Bot	<ul style="list-style-type: none">• Classify documents from multiple sources into different categories• Classification often involves screening documents in multiple formats (text, images, etc.) and hence requires automation technologies such as OCR, along with RPA and AI
Data-Entry Bot	<ul style="list-style-type: none">• Gather relevant information from unstructured documents for relevant systems or applications• Collecting and processing unstructured data with OCR and AI capabilities to read and interpret data in multiple formats
Chatbot	<ul style="list-style-type: none">• Directly interact with customers in natural language to solve low-complexity queries• Determine customer intent and sentiments with NLP and ML and respond accordingly to customer queries or escalate to concerned departments to be handled by human agents

Type of Business Process	Sample Use Case	Smart Digital Workforce	Business Outcomes
Transactional	Validating customer information in Know-Your-Customer (KYC) process	RPA bots, humans for exceptions	<ul style="list-style-type: none"> • Cost reduction • Increased workforce productivity • Increased process efficiency • Regulatory compliance
Transactional	Self-service: Answering FAQs in interactive chat	Chatbots, RPA bots, and human agents for exceptions	<ul style="list-style-type: none"> • Enhanced customer experience • Increased process efficiency • Improved agility
Transactional	Consumer onboarding	RPA bots with OCR for forms screening, and human agents and cognitive bots for exceptions	<ul style="list-style-type: none"> • Cost reduction • Improved quality and process efficiency • Enhanced customer experience
Knowledge-Based	Customer servicing: Answering complex customer queries	Chat-assist bots and human agents	<ul style="list-style-type: none"> • Increased workforce productivity • Increased process efficiency • Enhanced customer experience
Knowledge-Based	Sentiment analysis: Predicting customer emotions	Cognitive bots and human agents for actions	<ul style="list-style-type: none"> • Increased customer satisfaction • Increased workforce productivity
Knowledge-Based	Fraud detection in banking and financial services	Cognitive bots and human agents	<ul style="list-style-type: none"> • Better management and control • Increased process efficiency • Regulatory compliance

Teachable Machine

October 2017 | By Google Creative Lab

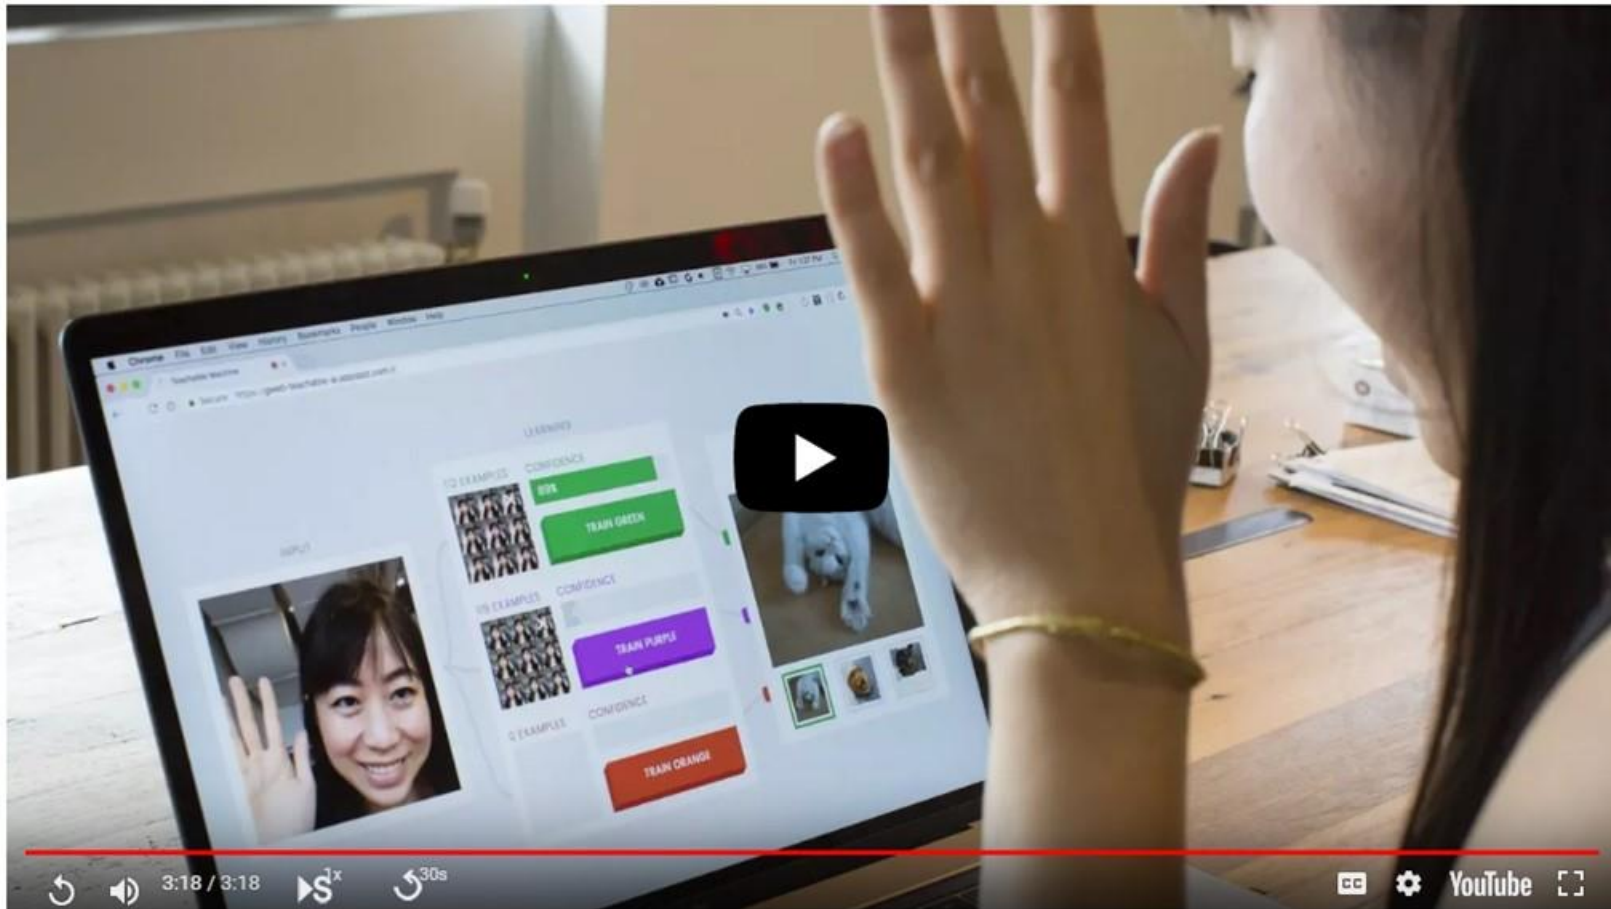

Teach a machine using your camera, live in the browser - no coding required.

COLLECTION:

AI Experiments

LAUNCH EXPERIMENT

GET THE CODE

A person is shown from the side, focused on their work on a laptop. The scene is dimly lit, with the primary light source being the laptop screen. The person has dark hair and is wearing a light-colored, long-sleeved shirt. The background is out of focus, showing what appears to be a desk or workspace with various items. In the top right corner, there is a blue triangular graphic element.

A.I. Experiments: Teachable Machine
