

**Dr Alex Yang**

**Serial entrepreneur in Fintech & Blockchain, ex-IB trader, Math PhD**

**Founder & CEO, Volmart Inc.**

**Alex@volmart.io**

Alex Yang is CEO of Volmart, a volatility marketplace for digital assets. Powered by its proprietary volatility risk engine and defi smart contracts, Volmart is the world's first hybrid risk manager offering digital asset structured products, aiming to build one stop shop for customized digital asset service. Our mission is to pave the road connecting Crypto Street and Wall Street.

Prior to Volmart, he was CEO of V Systems, a blockchain project led by Sunny King, a legendary developer and creator of Proof-of-Stake consensus. As CEO of VSYS, Alex was driving the project to solve the core scalability and stability problems to apply blockchain technology to real industry.

Prior to moving into blockchain industry, Alex was head of APAC structured rates trading at Nomura International, and head of China Structured Products at FICC, UBS HK. He started his career as a quantitative developer at Jump Trading in Chicago.

Alex has a PhD from Northwestern University and a BA in Mathematics from Peking University.
